The Asian Health Initiative

The **Asian Health Initiative (AHI)** has been working toward the ambitious goal of

improving the health status of medically under-served Asian populations in central Ohio by providing culturally and linguistically appropriate services since its inception in 1997.

According to the US Census Bureau, there are over 160,000 people from the Asian community living in Ohio, and nearly 40, 000 Asians living in Franklin County as of 2004. The Asian population continues to grow throughout the United States. The lack of culturally and linguistically appropriate health care is a serious issue for the Asian immigrant/refugee community, which comes from a wide range of cultures with varied medical practices and customs. AHI provides free clinical care, referral services, and advocacy to these members of our community.

Logistics
